CDMO – Sponsor Transparency

Drug product Sponsors are increasingly relying on Contract Development and Manufacturing Organizations (CDMOs) for drug manufacturing, and in doing so, are reliant on the CDMOs to report status and progress, which is often a manual process.
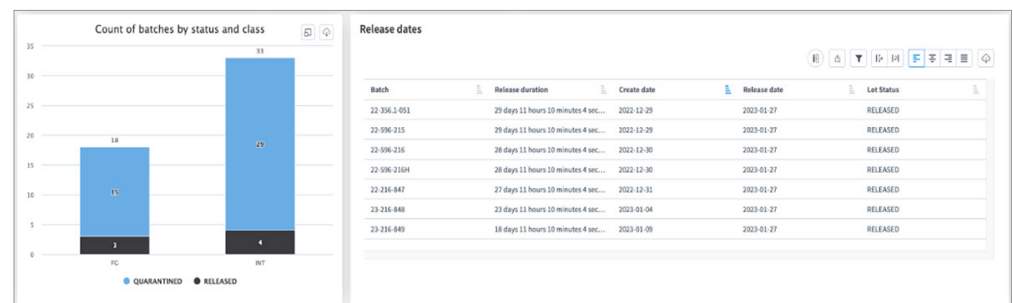

Aizon's CDMO – Sponsor Transparency solution enables cross functional collaboration with real–time visibility to production status through dashboards and reporting. It's built on a platform designed to unify and contextualize data, and enables increased trust between Sponsors and CDMOs.

Key Features and Benefits

Understand current production status and equipment / testing capacity at each phase of product lifecycle to more easily plan production and yield results

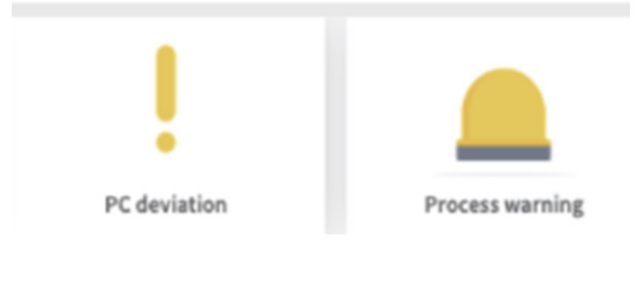

View current product testing and release progress to better manage personnel / testing resources

Real-time visibility
current batch status,
testing progress, and
where the batch is within
the QA/QC workflows

Current Batch: BO1823

Product: P1043-AB

Process Step: Agitation

Completion: 5 of 8 steps 42%

PC deviation

Process warning

Aizon's CDMO-Sponsor Transparency solution increases trust between Sponsors and CDMOs by providing visibility to manufacturing operations, in real time and on demand.

Aizon's Platform

Aizon's solutions enable life sciences manufacturers to improve decision making and outcomes by aggregating data and deploying compliant AI across the manufacturing ecosystem.

GxP Compliance

The platform allows you to maintain full GxP compliance via robust security features and data validation processes that are expertly designed to adhere to dynamic pharmaceutical regulatory requirements. Aizon complies with industry standards to provide GxP compliance you can trust:

→ Quality: ISO 9001

→ Information Security: ISO 27001

→ Cloud Security: ISO 27017

→ All data collection performed in accordance with ALCOA+ principles
