

Aizon AI Consulting Services

What We Do For Our Customers

Aizon's AI Consulting services focus on a singular mission: To enable our customers to harness the power of AI and apply it to their most strategic, valuable and mission-critical operations. We specialize in bringing innovative application of AI to bear as part of each customer's journey of digital transformation. This enables our customers to benefit from bringing AI out of the laboratory and putting it to work in their most critical business processes.

Common milestones:

1. **Build the foundation** – Break those data silos!
2. **Discovery** – Data exploration
3. **Starting point** – AI model creation, deployment, and interpretability
4. **AI Industrialization** – Scaling it up and nurturing an AI culture
5. **AI and GxP** – Model maintenance and audit readiness

Why Aizon AI Consulting?

Our approach gets real, real fast. We help our customers to identify where the application of AI can drive the most business value. Together, we can help you to identify the initiatives with the highest potential return on AI deployment. Whether that's root cause analysis (RCA), Overall Equipment Effectiveness (OEE), Continuous Process Verification (CPV) or something else, the combination of our people and our technology enables you to put AI to work driving increased value, fast.

How Do We Do It?

- Our Fast Forward workshops quickly determine the specific business areas and the appropriate initiatives that will bring you the highest ROI.
- Our Blueprint engagements take the outputs from Fast Forward and build the initiatives, the prioritization and the plans for your organizational application of AI. You'll be ready to take full advantage of the power of the Aizon GxP AI Platform.

Fast Forward

A one and a half day workshop to jump start your journey to an integrated manufacturing plant.

- Capture customer's operational focus (OF), technology readiness (TR) and regulatory approach (RA)
- Identify opportunities to leverage AI in real-world scenarios
- Assess the customer's ability to adopt AI for Business Value Realization
- Clarify business readiness for the journey of digital transformation

Blueprint

Over the course of 4 to 6 weeks, Aizon will help you build a blueprint to achieve your strategic goals.

- Determine customer's 'current position' in the (OF, TR, RA) space per Line of Business (LOB)
- Define a Transformation Program to guide the customer journey by using AI
- Develop a customised road-map through short and feasible Pilots (1..N), and the drivers for the Transformation Program to achieve overall maximum ROI
- Design a Center of Excellence (CoE) to sustain and enhance the customer's journey with each Pilot

Pilot Activation

Implement your custom blueprint via relevant and carefully selected production pilots.

- Document customer's Problem Statement for Pilots
- Identify all data relevant to the problem
- Use Aizon's AI algorithms to create model(s)
- Co-create dashboards and KPIs for maximum user adoption
- Deliver Basic User (Pilot-driven) and Expert Training (Aizon platform-driven) sessions
- Support roll-out plans via customer's CoE, post-pilot

About Aizon: Aizon is a software provider that transforms manufacturing operations with the use of IoT, cloud, advanced analytics, artificial intelligence, and pharma 4.0 technologies focused on optimizing pharmaceutical and biotech companies. The Aizon analytics platform seamlessly integrates unlimited sources of structured and unstructured data to deliver actionable insights across all manufacturing sites. Aizon offers an intuitive way to gain meaningful operational intelligence with data by enabling real-time visibility and predictive insights in a GxP compliant manner with end-to-end data integrity. Founded in 2014, the company is based in San Francisco, California and also has a European office in Barcelona, Spain.
